

Panthera

In an ever changing digital landscape with a rise in sophisticated cyber attacks, advanced attackers traverse your network at speed- vastly increasing their potential impact as time passes.

Snode Panthera disables attacks and defends vulnerable systems through its real time, automated response system. This novel approach augments your cybersecurity team and defends targeted vulnerable systems from persistent attackers.

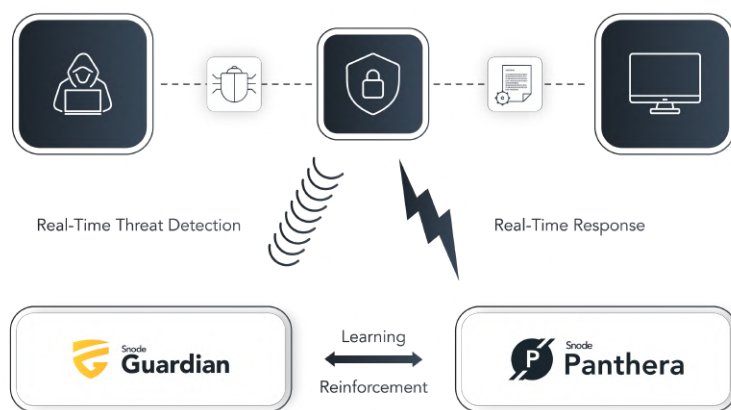

Much like a airborne fighter would deploy an intense flare to attract and destroy an enemy heat-seeking missile. Snode Panthera achieves the same by automatically deploying a defensive countermeasure in real time. This precision digital defensive acts without data decryption, network interception, business interruption or human intervention.

In a progressive digital landscape of systemic vulnerability, where threats persist and attacks are inevitable, the only way to defend against the unknown is to have a strategy that includes real-time, automated, countermeasure deployment.

Nithen Naidoo
CEO and Founder, Snode Technologies

How it works

When Snode Panthera detects a precursor to an attack, it will pre-emptively counter the attack and disable the attacker, preventing exploitation and system compromise. It does so by rapidly shielding vulnerable systems and simultaneously blocking the attacker without intercepting or interrupting business communications.

Benefits

- ✓ Real-time, 24/7 automated threat detection and response without any human intervention.
- ✓ Protection for vulnerable unpatched, misconfigured or unsupported operating systems and firmware.
- ✓ Defence against potentially compromised 3rd party networks, cloud-based platforms and devices.
- ✓ Automatically reducing MTR (mean time to respond) and ADT (attacker dwell time) by containing threats in real-time.

Snode Technologies

Snode encourages the embrace of the new emerging technology landscape with confidence. We help achieve superior performance using technology; empowered by our innovative, bespoke cyber defence solutions which protect, enhance and strengthen your organisation.

Snode protects clients across **6 continents**, in over **75 client environments** across more than **5 million devices**.

Are you ready to take control?

We're here to help you and answer any questions you may have.

We look forward to hearing from you.
